

# DURABLE INSULATED CONTAINERS

Dry Ice needs careful handling. You want a container that's specially designed to reduce sublimation and preserve quality and you'll also want to make sure it's safely contained to avoid spillage if you need to move it around your facility or transport it elsewhere.

## DRY ICE STORAGE

ThermoSafe's Durable containers are specially designed for the safe storage and distribution of Dry Ice. Their superior insulation preserves Dry Ice pellets or block until you need to use it.

- Industry-leading robust and reusable insulated bulk storage and transport solutions for Dry Ice.
- Ideal for the safe storage and transportation of Dry Ice pellets and blocks for Dry Ice producers, distributors and users.
- The double-wall polyethylene construction is filled with custom formulated urethane foam insulation which provides exceptional temperature control and ensures the lowest rate of sublimation.
- Most popular insulated containers in the Dry Ice industry as they combine performance with durability.
- Designed to be easy to move with forklifts to simplify transportation.
- Many different models available to suit every kind of use. Spares and accessories available to extend the life of your Durable containers and provide additional flexibility.
- When you need to store smaller quantities of Dry Ice, take a look at our Grey Line range of Storage Chests which are ideal for counter tops or can be placed on a dolly so they can be moved around.

Thermal Test  
Data Available

HR02P (2<sup>3</sup>)

Holds 100lb (45kg) of Dry Ice block

HR11P3-LC

Industrial grade casters make  
it easy to move

HR30P3

Holds 816lb (680kg) of Dry  
Ice Pellets

# Specification Overview
